A Great Opportunity to Network
THE NEW VÖGELE VF 600 SCREED
WITH FRONT-MOUNTED EXTENSIONS
VERSATILE AND RIGID!

Thanks to its sturdy design, the vibratory VF 600 Extending Screed is your perfect all-application screed. Whether paving highways, parking lots or residential areas, the VF 600 gives you the versatility of changing widths on the fly while holding adjustment and maintaining precise pavement profiles.

Technical Highlights
- Basic width 10 ft.
- Hydraulically extending up to 19 ft. 6 in.
- Maximum paving width 25 ft. 6 in.
- Sloping extension up to 10%
- Innovative electric screed heating
- Hydraulic crown adjustment -2.5% to +5%
- Optional berm available in three widths (12, 18 or 24 in.)

4 A Road Well Traveled
This year MAPA hits a major milestone, we celebrate 25 years as an Association. This is an incredible accomplishment for our Association, membership, and industry in the state of Missouri.

NOTEWORTHY NEWS

5 Hall of Fame
Recognizing those who have made significant and lasting contributions to the asphalt industry in Missouri.

6 Quality Paving and Construction Awards
MAPA recognizes our contractors’ high quality construction projects.

MAPA FEATURES

8 Celebrating 25 Years
With nearly record attendance and fantastic speakers, MAPA celebrated 25 years at our annual conference in January.

10 Member Profile: Hutchens Construction
Hutchens Construction Company has built a reputation of quality and commitment over the last 54 years. For 25 years, Hutchens Construction has been a great asset to the Missouri Asphalt Pavement Association.
A Road Well Traveled
MAPA CELEBRATES A MILESTONE

This year MAPA hits a major milestone, we celebrate 25 years as an Association. This is an incredible accomplishment for our Association, membership, and industry in the state of Missouri.

This milestone is something we cannot celebrate without recognizing the pioneering spirits who realized the need for an Association and oversaw its creation. At MAPA’s Annual Conference, the inaugural board of directors and those involved with the creation were inducted into the MAPA Hall of Fame. Their foresight, determination, and commitment to the betterment of our industry cannot go unnoted as we celebrate this milestone. Their induction into the Hall of Fame is a well-deserved honor.

While the founding individuals’ foresight is commended, we cannot celebrate 25 years without recognizing the incredible support, involvement, and generosity of our membership. As we enter our 25th year, we have our strongest membership yet with 85 members. Each of these companies contributes to the success of the Association and we cannot thank you enough for your support.

With this support, our Association has been able to accomplish some incredible things. Some of the more notable accomplishments include the creation of the Research and Education Fund which has allowed us to raise money for education and award scholarships to college students. MAPA and its members successfully raised over $1.1 million to endow flexible pavement chairs at the University of Missouri and Missouri S&T. Most recently, our members funded and made possible the expansion of the Association to include a marketing director. With this addition, MAPA launched a new website, marketing materials, and has expanded education and outreach across the state of Missouri.

Once again, the success of the Association would not be possible without our members. With your membership and support, we look forward to another great 25 years!
Hall of Fame

Several years ago MAPA developed a Hall of Fame to recognize individuals who have made significant and lasting contributions to the asphalt industry in Missouri. Hall of Fame inductees are those individuals who displayed a dedication, commitment, and undeniable passion for asphalt.

In celebrating MAPA’s 25th Anniversary, those individuals whose initial foresight led to the creation of our Association were honored. The 2015 MAPA Hall of Fame inductees included the inaugural MAPA Board of Directors and those instrumental to the formation of this Association.

We are proud to recognize and honor the efforts of the individuals and honored to recognize them in our Hall of Fame.

Mr. Matt Bowen
Mr. Roy Burns (posthumously)
Mr. Bill Clarkson
Mr. Frank Enloe
Mr. Don Harrison (posthumously)
Mr. John Hilty
Mr. Dan Linley (posthumously)
Mr. Bill Powell (posthumously)
Mr. Jerry Riley
Mr. Larry Glynn
Mr. Joe Regenhardt

The materials used in Perpetual Pavements are infinitely reclaimable, recyclable, reusable, and renewable.

#16
QUALITY PAVING AND CONSTRUCTION AWARDS

Each year our contractors strive to produce the highest quality construction projects. These range from major interstate paving projects to private or commercial parking lots. MAPA’s Annual Quality Paving and Construction Awards are designed to recognize those projects which represent the highest quality construction. We are beyond proud of our members’ hard work this year and are honored to recognize the following projects:

Maintenance
Maintenance projects include the application of surface treatments for pavement preservation. These treatments include all types of chip seal, slurry, microsurfacing, or unique maintenance applications, et cetera.

★ Second Place — Hutchens Construction
Chip Seal Various Routes, McDonald County. McDonald Highway Commission.

★ First Place — Missouri Petroleum
Microsurfacing Route 21, Carter County. Willow Springs Project Office.

Private and Commercial
This work includes using hot mix asphalt and/or warm mix asphalt to pave access roads, parking lots, private drives, et cetera.

★ Second Place — Hutchens Construction

★ First Place — APAC Missouri, Inc., Springfield.
Mercy Hospital Parking Areas, Joplin, MO. Mercy Hospital.

Municipal Paving
Municipal paving must use either full depth hot mix asphalt or warm mix asphalt for new construction, or reconstruction of city streets.

★ Second Place — Ideker, Inc.
City Streets. City of Kansas City.

★ First Place—APAC Missouri, Inc.
Springfield City Streets, Branson, MO. Shepherd of the Hills, Main Street, Branson Landing, and Boat Launch. City of Branson, MO.

Full Depth Paving
Full Depth paving may be either new or reconstruction that involves the placement of full depth hot mix asphalt or warm mix asphalt.

★ First Place — APAC Missouri, Inc.

Minor Road Overlay
Minor road overlays place a non super pave mix either HMA or WMA over an existing road which may include widening.

★ Second Place — APAC Missouri, Inc.
Angel Lane, Boone County.

★ First Place — Ideker, Inc.
Route 33, Clay County. Nashua Project Office.

Primary Route—Under 50,000 tons
Primary routes in this category must have less than 50,000 tons of asphalt paving which can include widening, overlay, full depth paving, new construction, or reconstruction

★ Second Place — APAC Missouri, Inc.

★ First Place — Ideker, Inc.
Routes 69, 1, & 9, Clay County. Truman Road Project Office.
Primary Route—Greater than 50,000 tons
Primary Routes in this category must have more than 50,000 tons of asphalt paving which can include widening, overlay, full depth paving, new construction, or reconstruction.

★ Second Place — APAC Missouri, Inc.
★ First Place — Chester Bross Construction Company.
I-49, Bates County. Clinton Project Office.

Airport Paving
Airport Paving includes all types of asphalt construction in an airport setting including taxiways, access roads, et cetera.

★ Second Place — Ideker, Inc.
Wheeler Downtown Airport, Kansas City, MO.
Kansas City Missouri Aviation.
★ First Place — Superior Bowen Asphalt Company.
Taxiway A, Kansas City International Airport, Kansas City, MO. KCMO Airport Planning.

Constructing a Perpetual Pavement today means that future generations will probably never need to replace the pavement structure.

Studies have shown that on average, over a 40-year period, asphalt pavements are more economical than concrete pavements.

YOUR PAVING PARTNER
SALES • RENTAL • PARTS & SERVICE

With over 55 years of paving experience between them, Randy Jordan and Pete Martin have experience in every aspect of the paving business including fleet management and maintenance, machine acquisition and life cycle management, work flows, resource allocation and profitable operations.

Give them a call for information and advice on the entire line of Cat® and Weiler paving machines.

MAPA’s Annual Conference held January 12-14, 2015 in Columbia, MO, celebrated the 25th Anniversary of the Association. With nearly record attendance and fantastic speakers, the 25th Annual Conference was a success!

The Conference kicked off Monday evening with a Casino Night featuring Vegas style gaming and the National College Football Championship game. Almost 90 people made it to play, watch, and socialize. Tuesday morning started with the Annual Business Meeting and Expo. Nearly 30 exhibitors packed the exhibit hall bringing with them new equipment and information.

Mitch Holthus, the voice of the Kansas City Chiefs, welcomed everyone with a great message about heart, commitment, and going the extra mile. Highlighting the changes in the industry over the years, Dave Ahlvers of MoDOT gave a great presentation about how much the construction industry and asphalt has evolved in Missouri. Ed Hassinger, MoDOT Chief Engineer, offered timely information about budget shortfalls.

The Awards Luncheon was a marked success this year recognizing 18 quality projects completed by our contractors across the state. MAPA-REF’s first scholarship recipients were recognized with several attending to express their appreciation. The Luncheon rounded out with the induction of 11 new members into MAPA’s Hall of Fame. The inaugural Board of Directors as well as those instrumental to the formation of the Missouri Asphalt Pavement Association 25 years ago were recognized and presented with plaques honoring their foresight and commitment to the industry.

Tuesday afternoon reconvened with an industry panel discussing the last 25 years in the asphalt industry. With Dave Yates moderating and Larry Glynn, Shawn Riley, Keith Davenport, Phil Hutchens, and Steve Jackson serving as panelists, we were treated to countless stories, endless knowledge, and colorful accounts of the asphalt industry over the years. Senator Kehoe followed the panel...
discussing how the legislature plans to secure some sort of revenue stream for transportation. Randy Candfield rounded out the day with a talk focusing on how liquid asphalts have changed over the years and what we can expect going forward.

Tuesday evening’s social hour and dinner packed the exhibit hall once again. The annual auction held to raise money for the PAC featured auction items generously donated by our members. We raised nearly $10,000 dollars this year. Thank you to everyone who donated and purchased items!

Even though Wednesday morning came too soon for some, the hall was filled with those ready to hear Andrew McCrea. Andrew started us off with a great message about not giving up and striving to exceed expectations.

Brett Trautman stopped by to give the MoDOT Field Office update which offered pertinent information about specification changes. Jeff Richmond of Roadtec offered his insights into the future of equipment and shared how equipment is likely to change and evolve over the coming years.

Jason Statsny of APAC finished the conference strong with a great presentation about his experiences with Intelligent Compaction.

The 2015 MAPA Annual Conference was undoubtedly a great time. MAPA extends a huge thank you to everyone who attended, supported, and made this event possible. Help us continue to grow this event and make it even better next year!
Member Profile
HUTCHENS CONSTRUCTION

Hutchens Construction, based in Cassville, Missouri, is a family owned and operated Construction Company. The company is a full service contractor serving Southwest Missouri, Northwest Arkansas, and Northeast Oklahoma performing asphalt paving, chip seal, seal coat, and aggregate production. Hutchens Construction works as a general contractor and subcontractor for private, commercial, and government work. With nearly 100 employees, the company has built and expanded over the last 54 years with a commitment to quality at its core.

Founded in 1961 by Evan and Marcia Hutchens in Cassville, the company had humble beginnings. Founder Evan Hutchens began work in the construction industry at the age of 16, working for various companies including Gillioz Construction in Monett Missouri and Spot Martin in Kansas City. At the age of 26, Evan Hutchens purchased a backhoe and dump truck. Shortly after that, he purchased a 600 gal distributor truck and started spraying liquid asphalt in chicken houses and doing small chip seal driveways. Within a few years he purchased a Caterpillar 212 motor grader and began blade mixing cold mix asphalt for use in patching and small driveways. In 1970, Evan and Marcia purchased a small 25 TPH Barber Green continuous mix asphalt plant and located it in an existing quarry in Monett, Missouri that was owned and operated by Olen Morris of Monett. In 1973 they purchased the quarry from Morris, where the company continues operations to this day. In 1986 the family purchased a quarry in Eagle Rock, Missouri. Hutchens Construction operated the two quarries and asphalt plant performing asphalt paving, base work, and chip seal in southwest Missouri until Evan's passing in 1992. At that time, his son Phil, took over as President.

The company has come a long way from its humble beginnings. With Phil at the helm, Hutchens Construction has experienced steady growth. Expansion has included the addition of two quarries and four asphalt plants. The company currently operates five asphalt plants, two in Missouri and three in Northwest Arkansas, along with four aggregate quarries. Hutchens maintains offices in Missouri and Arkansas and employs nearly 100 people.

Even with the considerable growth, Hutchens Construction has made quality construction a priority. The company does not just strive to satisfy its customers, but works to set the bar within the industry. This commitment to quality is evidenced by the company’s reputation and its numerous awards.
The company has received over 50 awards recognizing quality, safety, and environmental awareness, from the Arkansas Asphalt Pavement Association, Missouri Asphalt Pavement Association, National Asphalt Pavement Association, National Stone, Sand, and Gravel Association, U.S. Department of Labor, and the Army Corps of Engineers.

While these awards are testament to the quality of work completed by Hutchens Construction, the involvement with various industry associations is notable. Hutchens Construction is a proud member of the Missouri Asphalt Pavement Association, Oklahoma Asphalt Pavement Association, the National Asphalt Pavement Association, and the National Stone Sand and Gravel Association. With membership in each of these, company representatives serve on the various boards, participate in association events, and actively engage in efforts focused on the betterment of the asphalt industry.

Along with industry support, Hutchens Construction has also made philanthropy a priority. The company believes it should not just work in a community, but serve it too. The company is involved with local Chambers of Commerce, donates time and money to various school & community sporting events, sponsors seasonal festivals, volunteers at local schools, and numerous other events that require either time and/or donations to provide a benefit to each community.

Hutchens Construction Company has built a reputation of quality and commitment over the last 54 years. For 25 years, Hutchens Construction has been a great asset to the Missouri Asphalt Pavement Association.

Phil has served numerous terms on the MAPA Board of Directors as well as two terms as President of the Board. We are proud to serve Hutchens Construction Company and honored to have them as a member.
72,000 tons of recycled shingles were used in Missouri asphalt mixes in 2012.

Asphalt contractors in the state of Missouri used approximately 1.5 million tons of recycled asphalt in 2012. That is enough to pave a two lane highway (24’ wide) with three inches of asphalt from Saint Louis to Dallas, Texas!

Routine maintenance means milling off the surface for recycling, followed by placement of a smooth new overlay every 20 years.

Of the 2.27 million miles of paved roads in the US, 94% are surfaced with asphalt, including 65% of the interstate system.

Missouri has over 33,000 miles of surfaced roads.

The materials used in Perpetual Pavements are infinitely reclaimable, recyclable, reusable, and renewable.

Four Perpetual Pavements have been recognized in the state of Missouri.

EVENYTHING HITS THAT BOTTOM LINE.

The way you bid, the equipment you put on the job, your crew’s ability to make on-the-fly adjustments — everything about paving comes with a risk, or a reward. Fabick Cat® can help you manage both. Fabick provides the products and on-site support needed to improve your profitability. So you can bid with confidence, pave with efficiency and deliver on those non-negotiable performance specs.

Caterpillar is committed to your success. So is Fabick Cat. They are always there with financing, maintenance programs, parts and services needed to keep your equipment and crew on schedule. Or maybe ahead of it.
